Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is responsive to the amendments filed on June 13, 2005.

The Finality has been withdrawn in view of the new ground of rejection set forth below.

Any inconvenience to Applicant's and his representative is regretted.

2. In claim 26, line 2 of part (e), "The steering component" lacks antecedent basis.

It is suggested to be changed to -- the steering means --, which is the means for performing car body steering recited in part (d).

In the last line of part (d) of claim 34, note the "plates". It is not clear as to whether one of said plates is the "car body plate" recited in line 4 of part (d).

In the last line of claim 34, the period marking the end of the claim is missing.

In the last line of part (b) of claim 43, note the "plates". It is not clear as to whether one of said plates is the "car body plate" recited in line 3 of part (b).

The above noted problems may present confusions in the claims. Proper correction is required.

3. Claims 34-35 and 37-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wike (US 5,918,546) in view of Barber (US 875,565) and UK reference 2,091,660.

Wike discloses a linear steering truck apparatus similar to that recited in the instant claims, including means for performing car body steering; wherein, the geometries of pivot points in the forms of a parallelogram and a trapezoid are shown in Figure 28 of Wike.

Regarding the instant claimed side bearings, note for example the side bearings shown in Figures 2 and 5 of Barber. It would have been obvious to one skilled in the art to provide side bearings, e.g. similar to that taught by Barber, in the railway truck of Wike for enhancing load distributions and facilitating pivotal movement of the car truck relative to the car body.

Regarding the instant claimed rollers being provided with teeth, Applicant should consider rollers 10 of the UK reference being provided with interconnecting teeth. In view of the UK reference, it would have been obvious to one skilled in the art to further provide interconnecting teeth on the rollers of Wike, as modified, so as to facilitate proper movements of the rollers relative the associating plates thereof.

Regarding the instant claimed rollers being conical in shape, it is noted that the rollers of Barber appear to be conical as claimed.

4. Claims 8-12, 14-17, 19-24, 26 and 60-70 are allowable.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Le whose telephone number is 571-272-6682. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
